Rashtrapati Bhavan, New Delhi chooses EAGLE once again

AIRPOT LISA
Large Capacity : 2200 ml. Strong Stainless Steel body
Highest export item amongst AIRPOTS

On 19th August 1997, our Managing Director Mr. Naushad I. Padamsee (shaking hands) had the honour of meeting His Excellency the President of India Shri. K. R. Narayanan at the Rashtrapati Bhavan, as part of the Aga Khan Development Network delegation. Also seen in the picture are Mr. Hasanali I. Firasta (centre) President of His Highness Prince Aga Khan Shia Imami Ismaili Council for India and Dr. A. M. Khusro (extreme left), Chairman Aga Khan Foundation - India and noted economist.

The most recent EAGLE product chosen for service at Rashtrapati Bhavan is AIRPOT LISA, a Stainless Steel Vacuum beverage dispenser with a large capacity of 2.2 litres.

His Excellency the President of India Shri. K. R. Narayanan during his meeting in New Delhi with our Managing Director Mr. Naushad I. Padamsee specifically mentioned the need for large capacity flasks and was pleased to note that EAGLE exports 40% of its production, a major component being large capacity flasks.

EAGLE products which have been specially printed with the Ashoka pillar and the words सत्य मेव जयते (Truth alone reigns supreme) are in service at Rashtrapati Bhavan.

The Governor of Tamilnadu recognizes the role of Eagle in national growth

Earlier this year His Excellency the Governor of Tamilnadu, Shri Surjit Singh Barnala expressed great appreciation for the contribution EAGLE is making in the field of industrial progress and exports.

On 20th June 1990, our Executive Director Mr. M.A. Padamsee had called on His Excellency, Shri Barnala at Raj Bhavan to brief him on the activities and expansion programmes of our Madras plant.

Shri Barnala's active participation in the recent Presidential function to launch the first microwaveable flask re-iterated the strength of co-operation that exists between EAGLE FLASK INDUSTRIES LTD. and the Government at all levels.

Padamsee, who first moved to the United States in 1982 to build the family business, is also an inventor. His latest Eagle product, the recently released Plug-N-Mug, is an insulated coffee mug that can be plugged into a car lighter to keep the coffee 160 degrees.

He says he was trying to take into consideration the distinct habits of U.S. consumers in developing the electric mug, which retails for about \$29. It is targeted at businesspeople who spend a lot of time traveling by car.

"Drinking coffee in the car is something that is unique to American culture," he says. "Only here are cars equipped with cup holders, telephones, reclining seats and other modern conveniences. The Plug-N-Mug is an ideal product for the American commuter, especially during this time of year."

Other Padamsee inventions include the "Colder Holder," which holds a 20-ounce beverage or water bottle with an opening at the top for the bottle's mouthpiece, a spill-proof double-lock beverage holder, and a "Desk Docker," which is designed to keep coffee at a worker's desk.

"In the last four years we have really established our brand name in the U.S." Padamsee says. "Now we want to leverage this brand name recognition among Indian professionals working in the United States to do something to help their compatriots."
